

About Research and Development Cell

Objectives

- To improve the quality of institutional research at the national as well as international levels in the form of active publications and patents.
- To create awareness about the importance of research among students and faculties at the current time.
- To motivate students and faculties to work on potential research areas.
- To educate and train students as well as faculties with modern research tools like the latest search engines and software related to the field of research.
- To improve the active participation of faculties in writing the potential research proposals for various national as well as international funding agencies.
- To co-ordinate with national as well as international universities for research-related collaborations
- To review and monitor the research participation by students and faculties in various national as well as international platforms.
- To create interest in various pharmaceutical industries within the institutional research projects for commercial output.
- To promote institutional tech transfer from patents to commercial products.
- To interlink with institutional R&D as well as innovation cells for better outcomes of institutional research.
